

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings of claims in the application.

**Listing of Claims:**

- 1-10. (Canceled)
11. (Previously Presented) The method of claim 45, wherein the electronic document is downloaded from a database coupled to a computer network.
12. (Previously Presented) The method of claim 45, further comprising saving the electronic information disclosure statement in a database.
13. (Previously Presented) The method of claim 12 wherein the database is a local database in communication with a local computer network.
14. (Previously Presented) The method of claim 12 wherein the database is a remote database in communication with the internet.
15. (Previously Presented) The method of claim 45, further comprising providing access to the electronic information disclosure statement to multiple users over a network.
16. (Original) The method of claim 15 further comprising prompting the user for an access code when the user requests access to the electronic information disclosure statement, wherein when the correct code is provided by the user, the user may access the electronic information disclosure statement, and when the correct code is not provided by the user, the user may not access the electronic information disclosure statement.
17. (Previously Presented) The method of claim 45, further comprising providing the user with instructions on when an electronic document is to be disclosed to a patent office.

18. (Canceled)
19. (Previously Presented) The method of claim 45, further comprising:  
determining that a patent application corresponding to the electronic information disclosure statement is being electronically filed in an official patent office; and  
electronically transmitting the electronic information disclosure statement to the official patent office contemporaneously with the patent application.
20. (Previously Presented) The method of claim 45, further comprising generating, via an automated process, a letter to third party in a foreign country when the electronic information disclosure statement is filed in a patent office, the letter including at least a portion of the electronic information disclosure statement.
21. (Previously Presented) The method of claim 45, wherein the electronic document is an electronic version of a United States Patent.
22. (Previously Presented) The method of claim 45, wherein the electronic document is an electronic version of a foreign patent document.
23. (Previously Presented) The method of claim 45, wherein the electronic document is an electronic version of a publication.
- 24-31. (Canceled)
32. (Currently Amended) The computer system of claim 63, further comprising a database, wherein the set of instructions further comprises instructions to save the electronic information disclosure statement in-a the database.
33. (Previously Presented) The computer system of claim 63, wherein the set of instructions further comprises instructions to provide access to the electronic information disclosure statement to multiple users over a network.

34. (Previously Presented) The computer system of claim 32 wherein the database is a local database in communication with a local computer network.

35. (Previously Presented) The computer system of claim 32 wherein the database is a remote database in communication with the internet.

36. (Previously Presented) The computer system of claim 63, wherein the set of instructions further comprises instructions to download the electronic document from a database coupled to a computer network.

37. (Previously Presented) The computer system of claim 33 wherein the set of instructions further comprises instructions to prompt the user for an access code when the user requests access to the electronic information disclosure statement, wherein when the correct code is provided by the user, the user may access the electronic information disclosure statement, and when the correct code is not provided by the user, the user may not access the electronic information disclosure statement.

38. (Previously Presented) The computer system of claim 63, wherein the set of instructions further comprises instructions to provide the user with instructions on when an electronic document is to be disclosed to a patent office.

39. (Previously Presented) The computer system of claim 63, wherein the instructions to provide for the transmission of the electronic information disclosure statement to the official patent office comprise computer instructions to electronically transmit the electronic information disclosure statement to a patent office.

40. (Previously Presented) The computer system of claim 63, wherein the set of instructions further comprises:

instructions to determine that a patent application corresponding to the electronic information disclosure statement is being electronically filed in the official patent office; and

instructions to electronically transmit the electronic information disclosure statement to the official patent office substantially contemporaneously with the patent application.

41. (Previously Presented) The computer system of claim 63, wherein the set of instructions further comprises instructions to automatically generate a letter to third party in a foreign country when the electronic information disclosure statement is filed in the official patent office, the letter including a portion of the electronic information disclosure statement.

42. (Previously Presented) The system of claim 63, wherein the electronic document is an electronic version of a United States Patent.

43. (Previously Presented) The system of claim 63, wherein the electronic document is an electronic version of a foreign patent document.

44. (Previously Presented) The system of claim 63, wherein the electronic document is an electronic version of a publication.

45. (Previously Presented) A computer-implemented method of generating an information disclosure statement in a form suitable for filing with an official patent office, the method comprising:

providing a computer interface for a user to review one or more electronic documents, wherein the computer interface is configured to provide a prompt to allow the user to identify at least one electronic document as being relevant to a patent application;

receiving, from the user and via the interface, a signal indicating that the at least one electronic document should be disclosed to the patent office;

in response to the signal, extracting, via an automated process and from the at least one electronic document, a set of information to be used in an information disclosure statement;

incorporating, with an automated process, at least some of the extracted information from the electronic document into an electronic information disclosure statement,

wherein the electronic information disclosure statement comprises a form suitable for filing with an official patent office; and

providing for the transmission of the electronic information disclosure statement to the official patent office;

wherein the at least one electronic document includes information corresponding to a plurality of fields in the electronic information disclosure statement, and wherein incorporating at least some of the extracted information comprises storing the at least some of the extracted information in the corresponding plurality of fields in the electronic information disclosure statement.

46. (Previously Presented) The method of claim 45, wherein providing for the transmission of the electronic information disclosure statement to the official patent office comprises printing the electronic information disclosure statement to create an information disclosure statement for mailing to the official patent office.

47. (Previously Presented) The method of claim 45, wherein providing for the transmission of the electronic information disclosure statement to the official patent office comprises transmitting the electronic information disclosure statement electronically to the official patent office.

48. (Currently Amended) The method of claim 45, and wherein ~~allowing providing an interface for~~ a user to review one or more electronic documents comprises ~~allowing providing an interface for~~ the user to browse the Internet to find at least one relevant electronic document.

49. (Currently Amended) The method of claim 45, and wherein ~~allowing providing an interface for~~ a user to review one or more electronic documents comprises ~~allowing providing an interface for~~ the user to search a database of electronic documents to find at least one relevant electronic document.

50. (Canceled)

51. (Currently Amended) The method of claim ~~50~~, 45, wherein extracting a relevant portion of a set of reference information comprises:

allowing the user to select in the electronic document a relevant portion of a set of reference information; and

providing the user with an option to insert the selected relevant portion into the electronic information into the electronic information disclosure statement.

52. (Currently Amended) The method of claim ~~50~~, 45, wherein extracting a relevant portion of a set of reference information comprises:

allowing the user to drag a relevant portion of a set of reference information from the at least one electronic document into the electronic information disclosure statement.

53. (Currently Amended) The method of claim ~~50~~, 45, wherein extracting a relevant portion of a set of reference information comprises:

parsing the at least electronic document for a relevant portion of a set of reference information.

54. – 57. (Canceled)

58. (Previously Presented) The method of claim 45, wherein the computer interface comprises a web browser.

59. (Canceled)

60. (Previously Presented) The method of claim 45, wherein the electronic information disclosure statement is a document separate from but related to the patent application, and wherein the electronic information disclosure statement is configured to meet a set of requirements of the official patent office.

61. (Previously Presented) The method of claim 60, further comprising:  
receiving from the user a set of general information to be included in the electronic information disclosure statement, the set of general information comprising

information about the patent application to which the electronic information disclosure statement is related.

62. (Previously Presented) The method of claim 45, further comprising:  
downloading the at least one electronic document from the Internet.
63. (Currently Amended) A computer system, comprising:  
~~a processor and a computer-readable memory in communication with the processor, the computer-readable memory comprising a set of instructions executable by the processor, the set of instructions comprising:~~ processor; and  
a computer-readable memory in communication with the processor, the computer-readable memory comprising a set of instructions executable by processor to cause the computer system to perform a set of operations, the set of instructions comprising:  
instructions to provide an interface for a user to review one or more electronic documents, wherein the interface is configured to provide a prompt to allow the user to identify at least one electronic document as being relevant to a patent application;  
instructions to receive, from the user and via the interface, a signal indicating that the at least one electronic document should be disclosed to the patent office;  
instructions, responsive to the signal, to extract from the at least one electronic document a set of information to be used in an information disclosure statement;  
instructions to incorporate at least some of the extracted information from the electronic document into an electronic information disclosure statement, wherein the electronic information disclosure statement comprises a form suitable for filing with an official patent office; and  
instructions to provide for the transmission of the electronic information disclosure statement to the official patent office;  
wherein the at least one electronic document includes information corresponding to a plurality of fields in the electronic information disclosure statement, and wherein the instructions to incorporating at least some of the extracted information comprise

instructions to store the at least some of the extracted information in the corresponding plurality of fields in the electronic information disclosure statement.

64. (Previously Presented) A computer software program embodied on a computer-readable memory, the computer software program comprising a set of instructions executable by a computer, the set of instructions comprising:

instructions to provide an interface for a user to review one or more electronic documents, wherein the interface is configured to provide a prompt to allow the user to identify at least one electronic document as being relevant to a patent application;

instructions to receive, from the user and via the interface, a signal indicating that the at least one electronic document should be disclosed to the patent office;

instructions, responsive to the signal, to extract from the at least one electronic document a set of information to be used in an information disclosure statement;

instructions to incorporate at least some of the extracted information from the electronic document into an electronic information disclosure statement, wherein the electronic information disclosure statement comprises a form suitable for filing with an official patent office; and

instructions to provide for the transmission of the electronic information disclosure statement to the official patent office;

wherein the at least one electronic document includes information corresponding to a plurality of fields in the electronic information disclosure statement, and wherein the instructions to incorporating at least some of the extracted information comprise instructions to store the at least some of the extracted information in the corresponding plurality of fields in the electronic information disclosure statement.

65. (New) A computer-implemented method of generating an information disclosure statement in a form suitable for filing with an official patent office, the method comprising:

providing a computer interface for a user to review one or more web pages via a web browser, wherein the computer interface is configured to provide a prompt to allow the user

to identify at least one web page as corresponding to a document that is relevant to a patent application;

presenting to the user, via the interface, a first menu for the user to indicate that the document should be disclosed to the official patent office, wherein the first menu is configured for the user to select a document type of the document;

receiving, via the interface, an indication that the document should be disclosed to the official patent office, wherein the indication comprises an indication of the document type of the document;

based on the indication of the document type of the document, prompting the user for one or more pieces of information to be incorporated into an electronic information disclosure statement, wherein prompting the user comprises:

providing, via the interface, a second menu for the user to identify a type of information to be incorporated;

receiving, via the interface, a selection of a type of information to be incorporated; and

receiving, via the interface, a selection of a portion of the web page corresponding to the selected type of information to be incorporated in the electronic information disclosure statement;

in response to the selection of the portion of the web page, extracting, from the selected portion of the web page, a set of information to be used in the information disclosure statement;

incorporating, with an automated process, at least some of the extracted information from the web page into the electronic information disclosure statement, wherein:

the electronic information disclosure statement comprises a form suitable for filing with the official patent office;

the selected portion of the web page includes information corresponding to one of a plurality of fields in the electronic information disclosure statement; and

incorporating at least some of the extracted information comprises identifying a field corresponding to the selected portion of the web page, based on the

selection of the type of information to be incorporated, and storing the at least some of the extracted information in the identified field in the electronic information disclosure statement; and

electronically transmitting the electronic information disclosure statement to the official patent office.
